

Enhance donor experience. Improve your processes.

Donor Doc is an electronic pre-donation health history questionnaire and physical exam tracking software designed to help donor centers evaluate donor eligibility and suitability.

Configurable questionnaires for blood donations or site requirements.

System highlights

- Supports a variety of device types
- Track donor interview history
- Potential donors can self-administer
- Multiple language support for audio and text
- Track physical exam and pre-donation history

Key features & benefits

- Integrates with BECS systems
- Stores all data electronically
- Helps reduce incomplete questionnaires
- A paperless process saves time and resources
- Helps minimize discarded products
